- ✓ **Instant Messaging Recording**

Content Filter

The Protector combines multiple unique technologies to produce the ultimate Content Filter. This includes Web Filtering, Anti Spyware, Anti P2P, Anti Instant Messaging, Anti Games, Anti VoIP and IM Recording.

Web Filter with 54+ Categories

You can choose to block web categories such as: Pornography, News, Blogs, Auction, Proxy sites (To bypass web filters) and many other categories.

Web Proxy

Using the built-in Web Proxy will optimize the speed of all web-surfing within the company since all websites will be cached.

Anti-Spyware

The Anti-Spyware Filter blocks sites that try to install spyware on the user's computer. It also blocks workstations that are already infected with spyware from sending out sensitive information to spyware sites on the Internet.

Anti-P2P

The Anti-P2P filter blocks all P2P protocols including BitTorrent, Limewire and many others. This saves huge amounts of traffic on the network and makes sure no illegal content such as copyrighted movies and music is being shared.

Anti-Games

This filter blocks most network games such as: World of Warcraft, Counter Strike and other network games that consumes much time.

Anti-Instant Messaging

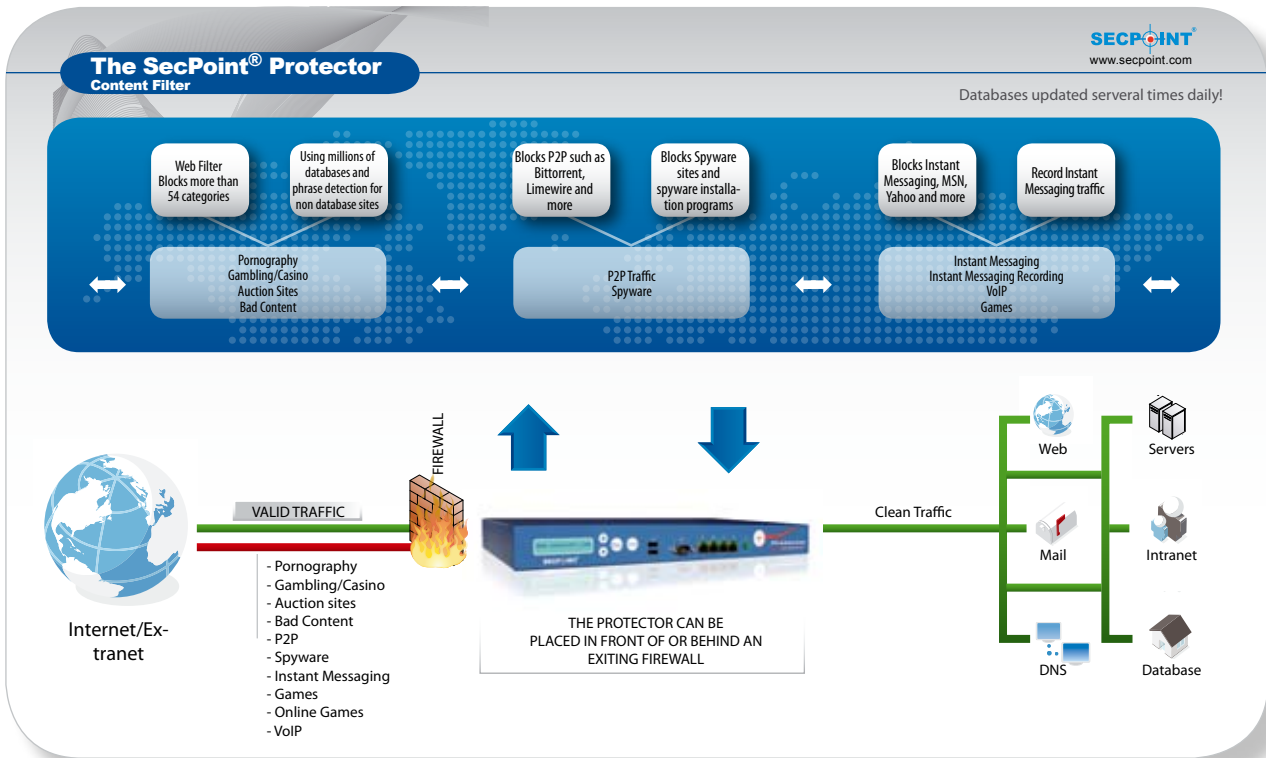

With Anti-Instant Messaging you can block Messenger programs such as MSN, Yahoo, Skype, and many others. This protects valuable files from being sent out of the network bypassing the firewall to other third parties on the Internet. It also saves valuable time that can be spent on chatting with private contacts.

Anti-VoIP

Controls the VoIP traffic on your network. You can control H.323 protocols and software programs such as Skype. This can protect you from unauthorised calls and the time these consume.

Instant Messaging Recording

Monitors Instant Messaging traffic on the network and controls if the messaging is authorized policy chat. For example if messaging is allowed for support or sales it is possible to monitor whether the traffic is being used for this specific topic and not for others that may consume time or to send out sensitive company information bypassing the firewall.

Features

Content-Filter

- ✓ Web content-filter
- ✓ 54+ Web filter categories
